SANDEEP Y

PROFESSIONAL SUMMARY:

Service Delivery manager with over 10 years of experience in healthcare data IT operations, including 8+ years specializing in Data management. Proven expertise in handling patient records, data analysis, statistical reporting, and client coordination with a strong focus on accuracy, compliance, and cross-functional collaboration. Skilled in developing and implementing SOPs, managing study build activities, and supporting regulatory inspections with a strong focus on operational excellence. Managed cross-functional team deliverables, ensuring timely execution, alignment with project goals, and quality standards. Technically proficient in using Microsoft Azure Services and Power BI, with direct experience in EDC systems, and automated reporting workflows. Known for driving operational efficiency, mentoring teams, and delivering results in fast-paced clinical environments.

SKILLS:

Product & Workflow Management: JIRA, Confluence, Zendesk, Microsoft Teams, SharePoint.

Clinical Data Platforms: Microsoft Azure Clinical Data Portal, EDC Systems

Study Build & eConsent: Study Cast, PPC Systems, eConsent Integration, Metadata Configuration

Radiology & Cardiology Systems: Brit PACS, Novapacs, Study Cast

Reporting & Visualization: Power BI, Visual Analytics, Custom Dashboards

Data Management & Analytics: Microsoft Azure Data Services, EDC Systems Excel (Advanced), Data Validation Rules, MDE Reporting

Operating Systems: Windows 7, Windows 10, Windows Server

Quality & Compliance: QA/QC Documentation, Audit Trail Management, SOP Implementation, HIPAA Compliance

Communication & Leadership: Client Relations, Cross-functional Team Leadership, Training & Onboarding Programs.

Version Control & Development Tools:

Git / GitHub — Source control, branching strategies, repository management, CI/CD familiarity

PROFESSIONAL EXPERIENCE:

PROJECT DETAILS

Role: Service Delivery Manager **SEP 2021 – DEC 2025**

Employer: Channel Soft

Project: Data Delivery – Meta site Data Management

RESPONSIBILITIES

- Established product vision and a strategic roadmap that achieved **95% alignment** with organizational priorities and stakeholder expectations.
- Defined release strategies for data delivery platforms, ensuring alignment with regulatory requirements, client needs, and long-term organizational goals.
- Directed application and system integrations that improved interoperability and reduced manual processes by **30%**.
- Owned delivery of end-to-end workflows, increasing platform scalability, reliability, and regulatory compliance.

- Translated complex operational and data requirements into automated processes, streamlining workflows and reducing turnaround times by **18%**.
- Prioritized and refined backlog items to optimize delivery pipelines, reducing cycle times by **25%** and accelerating feature delivery.
- Coordinated cross-functional teams and consistently achieved **98% of sprint commitments** across multiple product increments.
- Engaged stakeholders to capture requirements, validate outcomes, and enhance user experience, boosting customer satisfaction scores by **20%**.
- Implemented quality standards and embedded compliance checkpoints, improving audit readiness scores by **40%**.
- Led system upgrades and platform migrations, ensuring zero data loss, full traceability, and improved performance.
- Collaborated with IT security teams to embed role-based access controls, audit logs, and compliance safeguards into product features.
- Directed UAT planning and execution, validated functionality against requirements, and partnered with developers to resolve defects and deploy enhancements.
- Utilized Git and GitHub for version control, documentation management, and collaboration on configuration updates, workflow automation, and controlled releases.
- Collaborated with developers through GitHub pull requests, code reviews, and issue tracking to streamline enhancements and maintain high-quality releases.
- Defined KPIs and delivered dashboards, statistical reports, and trend analyses to support product decisions and demonstrate business value.
- Implemented product and process improvements that enhanced data quality, reduced rework, and improved team efficiency.
- Managed resource planning and budgets, consistently delivering projects **10% under forecasted costs** while maintaining quality and timelines.
- Built and maintained strong client relationships through proactive communication, expectation management, and delivery of measurable outcomes.
- Managed cross-functional teams including CDCs, ACDMs, QA specialists, SAS programmers, Study Build teams, and Project Coordinators.
- Ensured secure handling of sensitive patient data in compliance with HIPAA and institutional policies.
- Maintained QA/QC documentation, led internal audits, and ensured audit readiness across all study matrices.
- Supported longitudinal research studies by maintaining clinical databases and ensuring high-quality data capture and reporting.
- Facilitated communication between internal departments and external partners to ensure seamless data exchange.
- Directed query management workflows, resolving discrepancies and supporting CDC/ACDM operations.
- Delivered statistical reporting, MDE submissions, and trend analyses to support clinical decision-making and regulatory requirements.
- Strengthening operational performance by continuous improvement initiatives that enhanced accuracy, speed, and service delivery.
- Ensured seamless end-to-end delivery of clinical data operations by aligning people, processes, and technology to consistently meet project goals and exceed client expectations.

PROJECT DETAILS

Role: Senior Manager **JUN 2017 – SEP 2021**

Employer: Target Corporate services Pvt. Ltd

Project: Data Insights – Data Management

RESPONSIBILITIES

- Led integration of telehealth platforms with clinical data systems using secure APIs and cloud-based infrastructure.
- Managed patient data pipelines using Microsoft Azure, ensuring HIPAA-compliant storage and retrieval.
- Coordinated with IT teams to maintain uptime and troubleshoot portal access issues across Brit PACS, Novapacs, and Study Cast.
- Developed SOPs for data entry, validation, and audit trails using ticketing tools like JIRA and Zendesk.

- Oversaw QA/QC documentation using SharePoint and version-controlled repositories.
- Led a multidisciplinary team managing patient records, clinical data analysis, and client communications across remote healthcare platforms.
- Oversaw daily operations including staff scheduling, performance monitoring, and administrative coordination.
- Developed and implemented SOPs to streamline telehealth workflows and ensure regulatory compliance.
- Managed vendor invoicing and billing processes, ensuring accuracy and timely reconciliation.
- Coordinated end-to-end data operations for organ transplantation, from patient evaluation to post-transplant monitoring.
- Automated pathology report extraction using OCR tools and integrated results into clinical databases.
- Guided Study Build teams in launching recent studies, managing PPC timelines, and integrating eConsent modules.

PROJECT DETAILS

Role: Data Operations Lead **Nov 2015 – JUN 2017**

Employer: Target Corporate services Pvt. Ltd

Project: Clinical Data Management

RESPONSIBILITIES

- Supported clinical trial data capture using EDC platforms and ensured protocol compliance.
- Abstracted medical records and pathology reports for integration into research databases.
- Supported clinical trials by ensuring accurate documentation and timely data entry.
- Collaborated with lab technicians and pathologists to validate findings and maintain study consistency.
- Assisted in preparing study protocols and documentation for ethics review and regulatory submission.

EDUCATIONAL QUALIFICATION:

Master of Business Administration in Marketing and Finance
Osmania University, Hyderabad, August 2010

CERTIFICATIONS:

PMP (**Project Management Professional)** Certified,
GCP (**Good Clinical Practice**) Certified by CITI PROGRAM
